BONENG TRANSMISSION

B02-2006

# Boneng Transmission(Suzhou)Co.,Ltd

## Company Profile

BONENG Transmission Co., LTD specializes in the mechanical power transmission products. Established in 1992 . Boneng has developed leading R&D and manufacturing personnel and achieves elite and world-class quality using the most advanced processing and testing equipment from the finest international suppliers. With offices set up in every central city of China and steady-growing service spots abroad, Boneng provides the customers with the most prompt consultation and service.

BONENG produces a wide range of General Gear Units, Industrial Gear Units, Worm Gear Units and Planetary Gear Units, with power range 0.12 to 9550kW, supplemented by specific, combination and non-standard gear units required by different industries. These products are widely used and proved to be a great success.

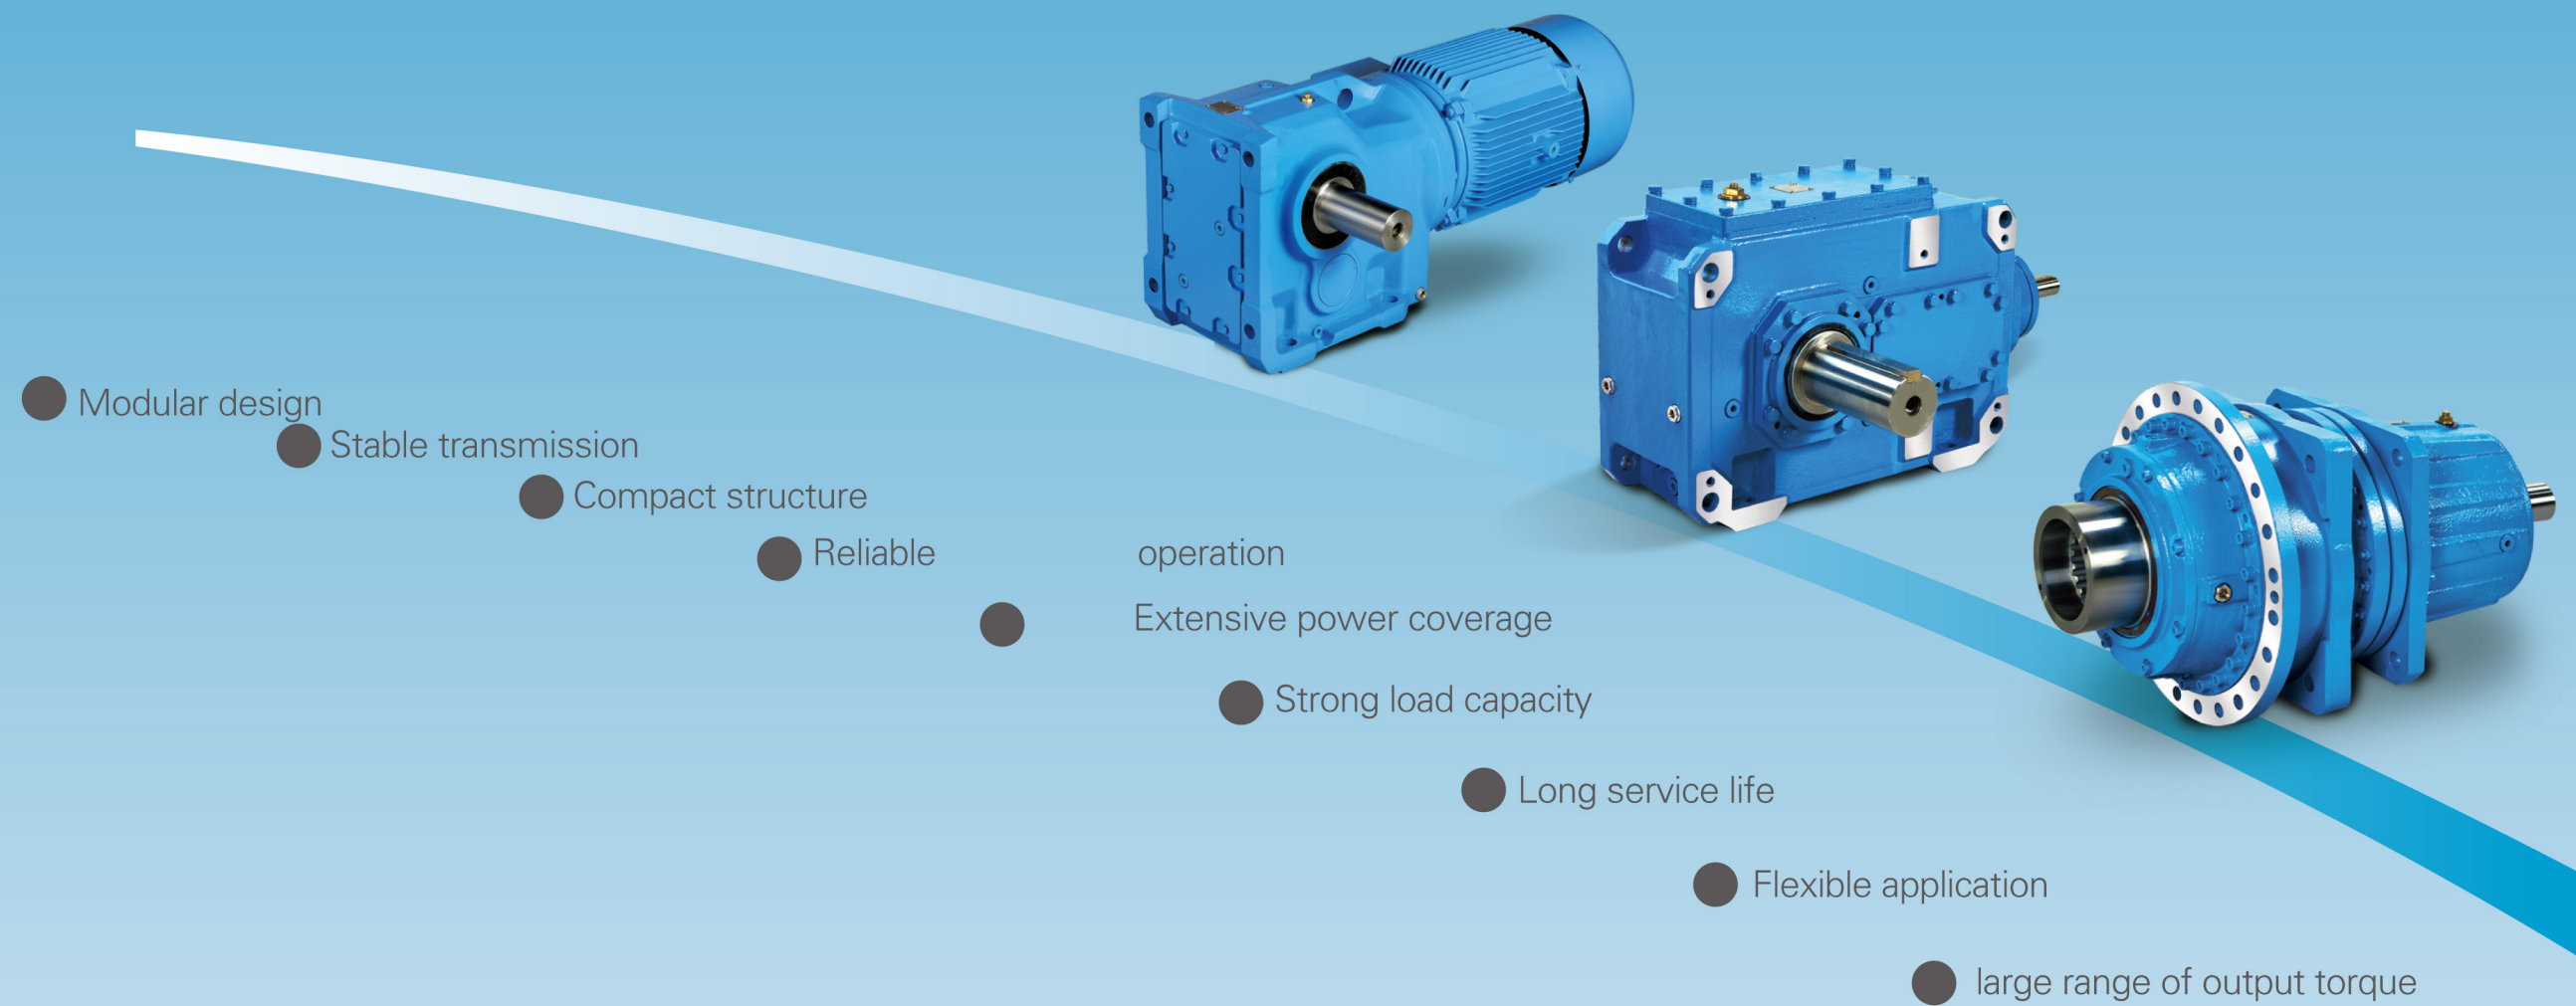

Boneng Transmission(Suzhou)Co.,Ltd  
Add: No.100 Ruyuan Rd.,Xiangcheng District,Suzhou,China.

Boneng Transmission Co.,Ltd  
Add: No.69 Boneng Rd.,Oubei Town,Wenzhou,China

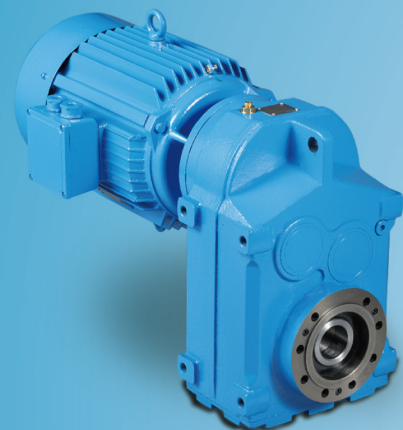

BONENG

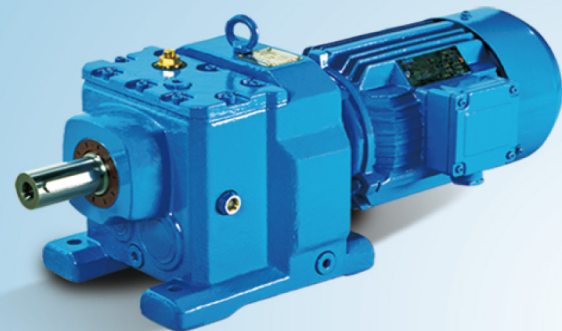

## Product Characteristics

- Modular design, compact structure, unique modeling, flexible application .
- Reliable operation, stable transmission, strong load capacity, large range of output torque, extensive power coverage .
- Good heat dissipation, impact resistance, low noise , long service life.
- The products are present in a broad range of important industries and national key projects, such as petroleum, coal, electricity, cement, metallurgy, harbor, shipbuilding, crane, stage, textile, paper-making, chemical engineering, environment-protection, logistics, light industry and plastics.

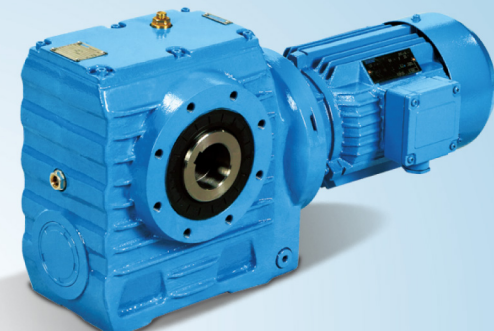

F series parallel shafts  
helical gear units

Ratio:4.3–273  
Torque:0.11–18kN · m  
Power:0.12–160kW

CR series helical gear units

Ratio:5–264  
Torque:0.13–18kN · m  
Power:0.12–160kW

S series helical-worm gear units

Ratio:23.8–389  
Torque:0.073–10.2kN · m  
Power:0.12–37kW

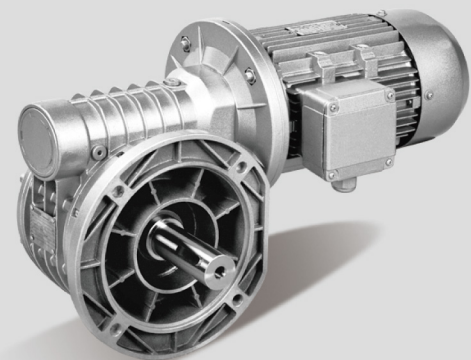

K series helical-bevel gear  
units

Ratio:3.5–191  
Torque:0.155–50kN · m  
Power:0.12–200kW

## Product Introduction

Worm Gear Units  
Spiral Bevel Gear Units  
Industrial Gear Units  
General Gear Units  
Industry-specific Gear Units and Special Designs  
Variable Speed Driver  
Planetary Gear Units  
Screw Jack

### Worm Gear Units

R series worm gear units(Cast aluminium box)

Ratio:6-80  
Torque:0.049-0.627kN · m  
Power:0.12-4kW

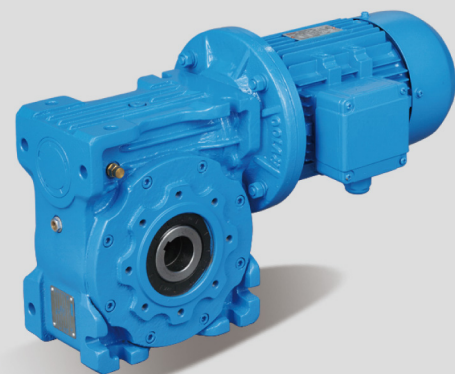

### Variable Speed Driver

MB series variable speed driver

Speed range:200-1000rpm  
Torque:0.003-0.352kN · m  
Power:0.37-22kW

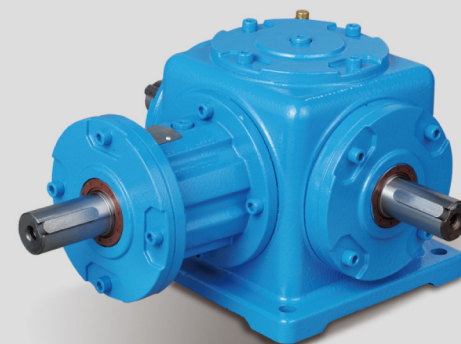

### Worm Gear Units

RV series worm gear units(Cast iron box)

Ratio:7.5-80  
Torque:0.63-9.1kN · m  
Power:0.12-45kW

### Spiral Bevel Gear Units

T series spiral bevel gear units

Ratio:1、1.5、2、3  
Torque:0.007-5.713kN · m  
Power:0.12-200kW

### Screw Jack

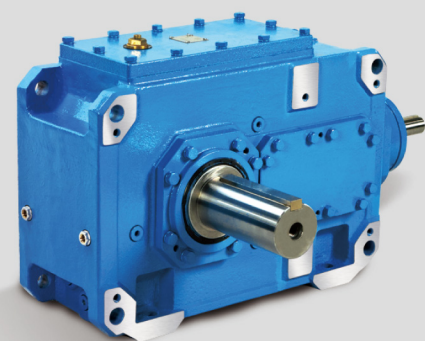

JW series screw jack

Loading ability:9.8-980kN  
Power:0.25-21kW

### Industrial Gear Units

H series industrial helical gear units  
B series industrial bevel-helical gear units

Ratio:1.25-450  
Torque:2.3-900kN · m  
Power:4-5688kW

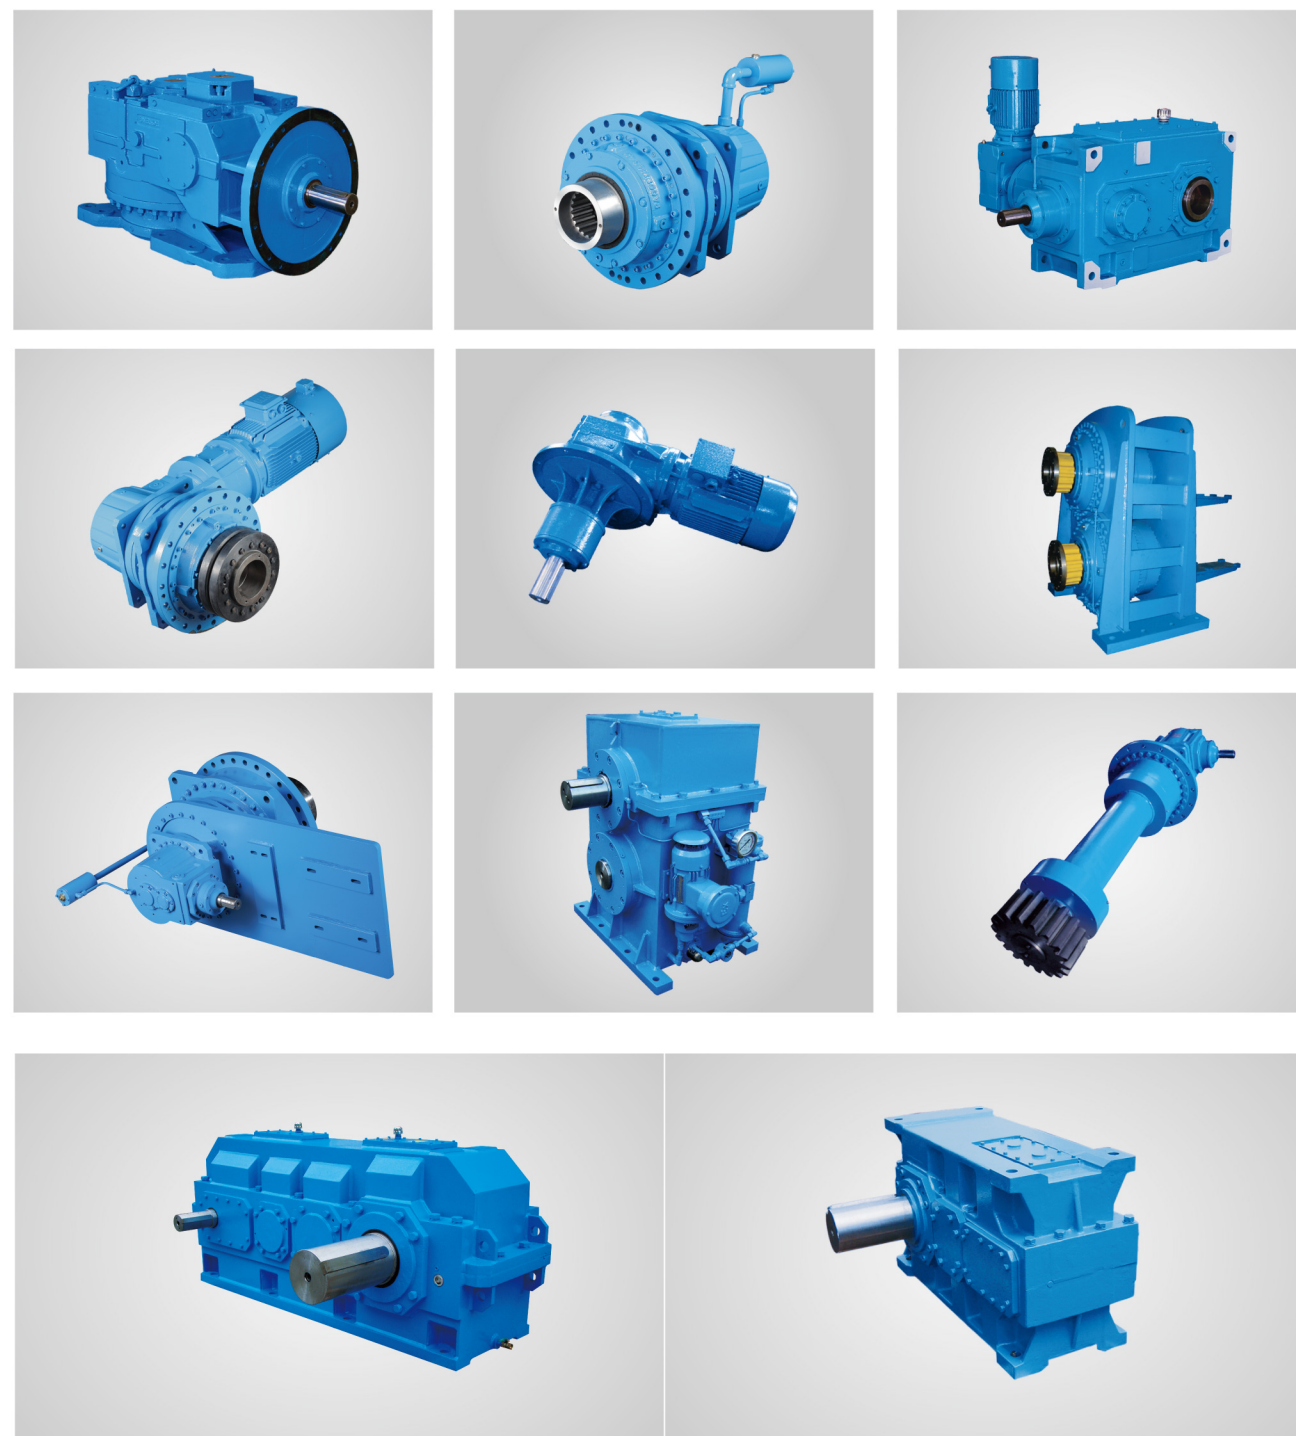

### Planetary Gear Units

P series planetary gear units

Ratio:25-4000  
Torque:22-2600kN · m  
Power:0.4-17630kW

## Industry-specific Gear Units and Special Designs

## Industry-specific Gear Units and Special Designs

## Industries Served

Boneng Gear units and products are found in every industry, including: power generation, coal, cement, metallurgy, harbor, shipbuilding, crane, environmental-protection, stage, logistics, textile, paper, plastics and a wide range of processing applications for light industry. Boneng products are known for smooth operation, high reliability and durable performance and are highly sought after by customers. Boneng technical experts and engineers working from any of our International and regional locations or from our corporate headquarters are always there to provide you with comprehensive technical support and service.

## Service System

Service system constituted for Boneng brand takes customer as the center, through convenient communication, based on solving problems, further establishes the three phase service system. At primary phase, our professional engineers will study customer's request and provide professional type selection solutions. Then at the secondary phase, we provide high efficient and quality products through optimized manufacturing and inspecting process. And at third phase, we arrange professional service engineers to solve troublesome transmission issues, further ensure wide application of the Boneng user's products.
