

# The best choice

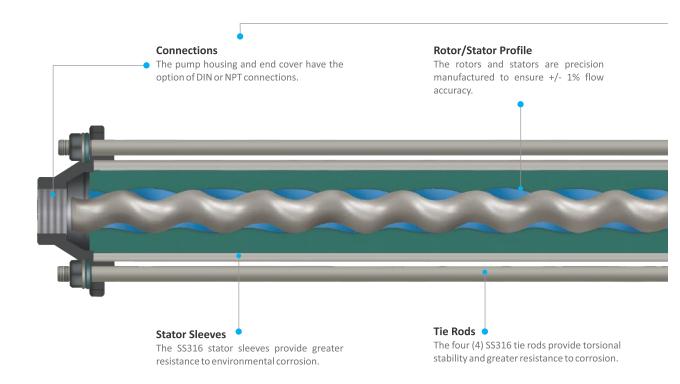

for precise metering applications

### RJ SERIES OF METERING PUMPS

Roto RJ Series pumps are for low flow applications demanding high accuracy and repeatability. They can handle a wide variety of fluids ranging from clean and clear liquids to abrasive, corrosive, viscous and solid laden media. The pumps can maintain flow with repeatable accuracy of  $\pm$ 1%. The RJ Series is available in 6 capacities (0.68 – 500 l/h) and 3 differential pressure ranges (6,12 & 24 Bar).

## **ADVANTAGES**

- Capacity is directly proportional to speed
- Inherently self-priming
- No internal valves no clogging
- Low NPSH required
- Linear flow with low shear

- Reversible
- Suction lift capability up to 9.5 meter water column
- Easily changeable pumping elements for different capacities
- Simple to operate
- Highly efficient

# **APPLICATIONS**

Roto RJ series pumps are designed to handle a wide variety of fluids for number of applications in industries such as:

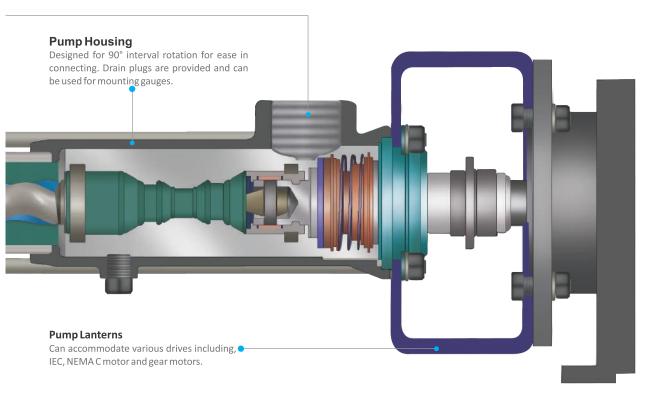

- Wastewater Treatment
- Pulp & Paper
- Chemical Processing

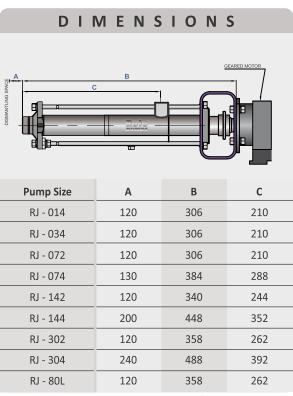

- Pharmaceutical
- Petrochemical
- Petroleum Refining

- Cosmetic
- Mining
- Food

### **MATERIAL OF CONSTRUCTION**

Standard RJ Range pumps are manufactured with 316 stainless steel wetted components and a single mechanical seal. The stator elastomers include; Natural, Nitrile, EPDM, Chloro-sulphonated rubber, HNBR, Viton, and Aflas®. Pumps can be manufactured in various exotic alloys including Hastealloy, Duplex, and Alloy 20 to fit the application.

Available in 1" NPT port connection at Suction & ½" NPT connection at Discharge in all pump sizes.

- All dimensions are in mm
  All dimensions & specifications are subject to change without prior notice

SELECTION TABLE					
Pump Size		PRESSURE BAR			
		0	6	12	24
RJ - 01	FLOW RATE LPH	7.50	7.20	7.20	6.90
RJ - 03		18.90	18.20	18.10	17.30
RJ - 07		45.90	44.10	44.00	42.10
RJ - 14		91.40	87.90	87.60	84.30
RJ - 30		180.00	173.00	172.30	166.30
RJ - 80L			460.00	-	-
